DETAILED ACTION

Applicant's arguments filed 6/1/09 have been fully considered but they are not persuasive. Due to the new claims presented in the response filed 6/1/09 a new art rejection is recited below. Previous rejections not recited below are withdrawn.

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1,15-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Foor et al. (WO 03/079788; 10/2/03). Foor et al. teach a fungicidal composition comprising fluopicolide and chlorothanil (page 44 lines 7 - 11, page 50 Table A Compd No. 1). Foor et al. teach that to the composition can be added diluents and surfactants (page 44 lines 33-35). Foor et al. teach a method of applying the composition to vegetable and fruit crop in order to control fungi growth (page 48 line 29 - page 49 line 22).

Response to Applicants' Argument

Although Applicants acknowledge that Floor et al. disclose the combination of fluopicolide to chlorothalonil, the Applicants argue that Floor et al. do not teach the

narrow and specifically defined ratios of fluopicolide to chlorothalonil as recited in the claims. Note the claims recite fluopicolide to chlorothalonil in a ratio of from 1:20 to 1:1. The Examiner argues that Floor et al. at page 44 line 10 teach the combination of fluopicolide and chlorothalonil. This teaching reads on the 1:1 ratio of fluopicolide to chlorothalonil claimed.

New Rejection

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Floor et al. as applied to claims 1,15-17 above. Floor et al. teaches all that is recited in claims 21-23 except for fluopicolide to chlorothalonil in a ratio of from 1:20 to 1:2. Note, Floor et al teaches the combination of fluopicolide with chlorothalonil which makes all ratios of fluopicolide to chlorothalonil obvious in the absence of unexpected results. The specification provides data for the combination of fluopicolide to chlorothalonil in a ratio range of 1:20 to 1:1. The data appears to be unexpected. However, the Applicants do not provide data for fluopicolide to chlorothalonil external to the scope of the claimed ratio range of 1:20 to 1:1 to show that expected results would be obtained.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
